Specifications of model shown:
BMW X1 xDrive28i.

Engine:	BMW TwinPower Turbo four-cylinder engine
Power output:	180kW / 245hp
Wheels:	18" LM light alloy wheels Y-spoke 322
Exterior colour:	Valencia Orange metallic
Upholstery:	Nevada leather in Oyster with orange/black piping
Interior trim:	Fineline Bay fine-wood trim, matt

Editorial

BE SPONTANEOUS.

Modern life is full of possibilities. Vibrant cities and alluring landscapes offer a unique range of activities of every kind. It's up to us to seize those opportunities, to dream up unusual ideas and see them through – ideally with the new BMW X1.

It's the ideal vehicle for anyone who wants to go their own way and live life according to their own rules. In other words, it's a car with character. And its impressive functionality and modern technology, like BMW EfficientDynamics and BMW ConnectedDrive, make it the perfect outdoor companion. No wonder it's one of the most coveted Sports Activity Vehicles.

The BMW X1 is now also available with two design worlds: with the BMW xLine and the BMW Sport Line. These enhance both the exterior and interior with high-quality materials, perfectly matched colours and superb workmanship, which can be further customised to suit your personal taste. In just a few steps, you can create an automobile as individual as you are. Your own new BMW X1.

www.bmw.com/x1

READY FOR TAKE-OFF.

► Every day has its own excitement. It's just there for the taking. And the new BMW X1, BMW's compact Sports Activity Vehicle, seizes the day in spectacular style. With its elegant design and versatility, it will guide you through modern life with energy and enthusiasm – to wherever you want to go.

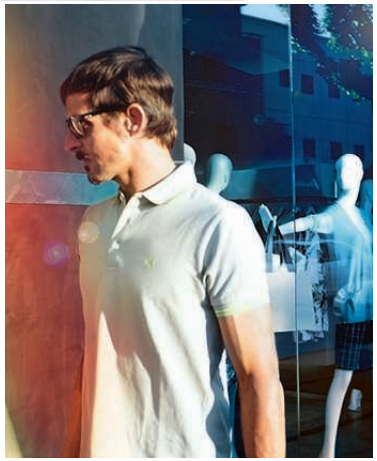
The new BMW X1 is the kind of automobile that can do it all. It's incredibly versatile and relishes every adventure, and with its compact external dimensions it can always find a way through the labyrinth of city streets. But don't let that fool you: inside, it's surprisingly spacious. Whether you're on your way to work, taking a shopping trip for two, or headed for an action-packed weekend with friends, the new BMW X1 is your can-do companion. It will add a special something to your life that you can enjoy day in, day out.

TAKING THE STREETS BY STORM.

▶▶I No matter which neighbourhood you're driving through, the new BMW X1 always steps out in style. Its front and back have been redesigned to make its distinctive character more striking than ever before.

The new BMW X1 is both effortlessly elegant, yet also seriously sporty. Ascending lateral lines, a long wheelbase and short overhangs make its dynamic BMW look and characteristic SAV proportions all the more impressive. Newly designed bumpers in body colour emphasise its exclusive appearance. Details like the inserts along the side skirts and the front and rear bumpers highlight its energetic personality. Its innovative lighting design is equally as impressive. The classic BMW double round headlights are available with Xenon technology or optional white free-standing parking lights and the LED accent lights, lyrical chrome elements and round fog lights create a powerful and unmistakable appearance. Clearly visible auxiliary indicators are integrated into the exterior mirrors and the characteristic L-shaped rear lights with LED elements make the BMW instantly recognisable, even at night.

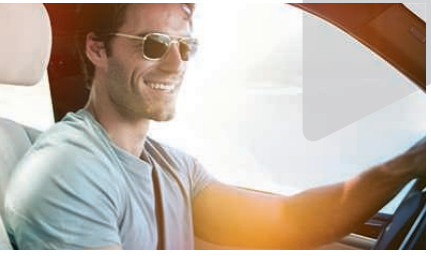
For those who want to customise the new BMW X1 even further to express their own individual style, there's the BMW Lines. Take for example the xLine, which includes bumpers with painted panels on the front, sides and rear, as well as a matt silver bar on the air intakes. In combination with the newly designed bumpers, these exclusive features truly make the new BMW X1 stand out from the crowd.



ONE BMW. TWO WORLDS.

Design is a question of taste, but even more so a question of personality. That's why the new BMW X1 comes in two individual styles: powerfully elegant or sporty and agile.

The new BMW X1 has a typical X family profile. The stretched bonnet, the deep-set passenger compartment and slightly sloping rear window create an elegant silhouette. The xLine adds several classic SAV characteristics: 18" light alloy wheels in a distinctive Y-spoke design, matt silver side skirts and an interior filled with naturally harmonious colours. The Sport Line is more dynamic with its high-gloss Black trim, deluxe wheels with 18" bi-colour spokes and a breathtaking interior rich in contrast.



SENSE OF FREEDOM INCLUDED.

►► The new BMW X1 safely takes you to almost any conceivable destination and its power and agility make it a thrill to drive – both offroad and on.

Give the new BMW X1 free rein and it will reveal the full extent of its abilities. No matter which of the 20 different engine/transmission combinations you choose, you'll be won over by their outstanding power delivery, exceptional driving dynamics and unparalleled efficiency. The most impressive of all is the BMW X1 xDrive25d. Like all the models featuring the optional intelligent xDrive four-wheel drive system, it effortlessly masters even the most difficult roads as the engine distributes the power variably to both axles. This increases the vehicle's already impressive traction – even on sand or gravel. And if you choose the standard sDrive rear-wheel drive system, you'll also enjoy premium BMW mobility and agility.

TWO PROS IN THE SNOW

Extreme skier Roman Rohrmoser from Zillertal is always on the lookout for fresh snow and virgin slopes. The BMW X1 is his constant companion through the winter.

Few skiers can imagine how steep a 45-degree slope looks from above. “Most people think of half a right angle when they think of 45 degrees. But from above it looks totally different: it just goes straight down. It’s enough to make even a professional feel queasy.” Roman Rohrmoser is a professional, and 45-degree slopes are his workplace. He’s been skiing since he was two years old and as a teenager was very successful at Alpine racing. He’s been doing freestyle skiing for the past decade and is currently a member of the K2 Backside Adventure Team. From Alaska to Chile, the 27-year-old has left his mark on the steepest deep-snow slopes and was probably the first person to ski some of them. Steepness aside, it’s even harder to imagine what the feats Roman Rohrmoser actually performs on those slopes: he jumps towering rocks and is constantly doing flips or twists. Then he continues skiing down normally, or sometimes backwards – thanks to his twin-tip skis that curve up at both ends.

Austrian Roman Rohrmoser is regarded as one of the best freestyle skiers in the world and is part of the K2 Backside Adventure Team. He uses his BMW X1 to drive through sleet and snow to the best ski slopes. He was also involved in the development of the Top K2 ski model, which is available as a limited edition design from BMW M.

While it may sound like slapstick, freestyle skiing is at the cutting edge of extreme sports. It all looks so easy: Rohrmoser appears to effortlessly and playfully glide through waist-deep snow. But actually it’s the result of hard training and a lot of courage. “On the days when we shoot, we’re usually on our skis all day, so stamina, concentration and fitness are essential.” Rohrmoser has turned his hobby into a career: he spends every winter freestyle skiing and performing breathtaking stunts that are captured on film. He works together with the best action film team in the world. When shooting in remote locations, they often use a helicopter. The challenge is always to shoot as many scenes as possible when the weather is perfect, with clear blue skies and snow like powdered sugar – so there’s no time for long climbs. Of course, having been born in the Zillertal Alps, Rohrmoser also likes to ski at home and in other Alpine hotspots. He’s always on the lookout for virgin snow and ideal conditions, and he drives his BMW X1 to all kinds of mountainous destinations, such as St. Moritz, Courmayeur or Livigno. Last year he covered 40,000 kilometres – some of which were part of a road trip shown on BMW TV. As a freestyle skier from an Alpine region, the BMW X1 is his vehicle of choice. With its intelligent xDrive four-wheel drive system, he’s made it up every mountain so far despite snow and ice. Thanks to the folding seats and a ski bag, he’s always got plenty of room for baggage, even longer trips with friends. Rohrmoser sometimes regrets that he has to take the helicopter up the last few metres of the mountain, instead of powering on in his BMW X1.

Further information and videos can be found at

THE WORLD LOOKS BETTER FROM THE INSIDE.

The interior designers of the new BMW X1 were guided solely by the requirements of the passengers. And it shows: particularly in the multitude of high-quality details. The elegant surfaces and artistic arrangement of exclusive electroplated inlays in the cockpit set new standards in premium design.

The interior of the new BMW X1 is sophisticated down to the very last detail. First-class workmanship of the finest materials create a high-quality atmosphere and the harmonious array of colours is a pleasure to behold. The high-gloss Black trim and air vents reinforce its stylish character, as do the luxurious inlay around the gear lever and the cup holders in the centre console. Ample additional storage space is provided by the side pockets in the front doors.

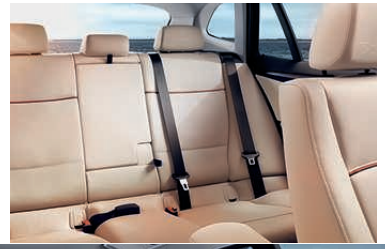
The stunning cockpit design ensures the driver and front passenger have plenty of room. The driver will also enjoy the benefits of the newly redesigned centre console, not to mention the ergonomic orientation of all other important controls – such as the optional Navigation system Professional with a high-resolution 8.8" colour display, the automatic air conditioning and the iDrive Controller. With the iDrive Controller, you can intuitively operate countless media and radio functions, as well as the navigation system or your mobile phone. Personal MP3 files can be saved to the optional Navigation system Professional's integrated hard drive via the USB/ audio interface, so you can compile your own personal soundtrack for each journey.

Along with its impressive level of comfort, the interior also exceeds in terms of safety. Passengers are protected by six standard air bags and an incredibly rigid passenger cell, which features defined deformation zones for the highest level of safety. The BMW X1 was awarded five stars in the Euro NCAP Crash Test and in the Pedestrian Protection Test.

Outstanding quality as far as the eye can see. The cockpit is clearly designed and angled slightly toward the driver. Features like the optional automatic air conditioning and the functional bookmarks make for an even more comfortable ride.

Spontaneous people need a vehicle that can keep up. The new BMW X1 combines intelligent features with ample storage space and an expandable, customised luggage space. In short: it's always ready and raring to go.

Our desires change daily, hourly, even by the minute. The new BMW X1 simply adapts to that change. Whether it's four passengers or four suitcases that will accompany you on your next adventure, the BMW X1 can fit it all with a row of backseats that can be folded down individually in a 40:20:20 split. During the drive, bottles can be tucked away in the door pockets, and takeaway drinks fit neatly in the cup holders on the centre console. These are just a few of the features that make the versatile new BMW X1 perfect for just about any kind of transport task.



ONE SIZE FITS ALL.

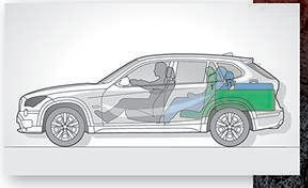
The backseat's intelligent 40:20:40 split opens up a raft of new possibilities. For example, the centre seat can be folded down so that long narrow objects can be conveniently slid through the middle, while retaining two full seats on either side. From here, rear passengers can also enjoy the sunshine streaming in through the optional panorama sunroof.

THE WHOLE WORLD IN YOUR TRUNK.

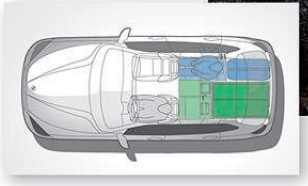
Wherever your travels take you, the luggage compartment's countless variations will meet all your personal needs. The backrest can be folded down in a 40:20:40 split and each section can be individually reclined in ten steps from 1° to 31°.

Using the **standard setting,** you can comfortably drive with 5 people in your X1 – with the rear seats at a 25° angle, you can fit for example 2 large suitcases or 5 beverage crates in the luggage compartment (luggage compartment capacity of up to 420 litres).

You can sit even more comfortably thanks to the **comfort setting** with the rear seats at a 31° angle. To safely transport bulky items, you can fold down the rear backrest almost horizontally (**cargo setting** with 1° angle).



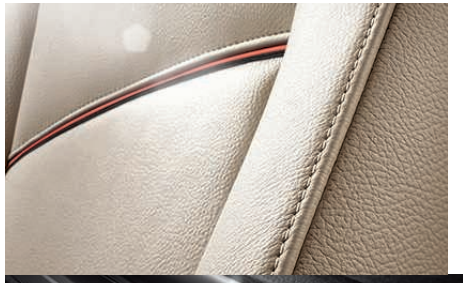
Or you can combine both comfort and cargo settings. On one side, you can transport long and bulky items, while the other side comfortably seats a passenger in the rear. And there's even room for their luggage behind them in the luggage compartment.



When you have big plans, you need plenty of space. The new BMW X1 has all that and more. The backrest folds down in a 40:20:40 split and each section can be individually inclined in ten stages from 1° to 31°, so you can increase the luggage compartment's volume to up to 480 litres without having to fold down the backrest. When the backrests are completely folded down, you'll have an impressive 1,350 litres of storage space. Enough room for everything fun.

Natural: xLine

The high seating position and optional xDrive four-wheel drive system make the BMW X1 the perfect companion for active people. And the new xLine brings out its dynamism naturally with its selection of matt wood interior trims and the optional light leather upholstery.



A FRESH APPROACH FOR A MORE NATURAL INTERIOR

One look at the interior of the new BMW X1 is all it takes to appreciate the perfect interplay of quality materials, superior workmanship and two individual design worlds.

A functional and aesthetic vehicle interior is a synthesis of practicality, quality and design. Great controls are so intuitive that you don't even notice them. BMW has long been a pioneer of exceptional ergonomics. It was the first automotive manufacturer to develop the concept of driver orientation, with the centre console angled slightly toward the driver, the revolutionary operating system simplified down to the one-button iDrive and the functional bookmarks for frequently used functions. BMW engineers are constantly refining proven products and at the same time researching new technologies for an even more comfortable and intuitive vehicle operation. The interior designers assess the quality of materials in the vehicle interior with a simple yet conclusive test: the material should feel the way it looks. Leather is pleasant to the touch and wood is warm. Even the matt finish and soft foam of the synthetic materials appear luxurious. The buttons and gear lever are made to be touched. Aside from the subjective assessment of the design, there are also a few objective requirements for the combination of colours and materials. Do they work with particular vehicles and do they reflect international trends in the design of luxury goods? Does it match the style and the tradition of a premium German automobile? The BMW X1 is the first compact premium SAV (Sports Activity Vehicle) and its new interior fulfils the role of both trendsetter and being characteristically BMW. The new BMW X1 sets standards with cutting-edge materials, contemporary colours and high-quality details. BMW designers created a new centre console strongly oriented toward the driver, allowing for the quicker, safer operation of important functions. And for the first time, you can choose to customise your new BMW X1 with one of two design worlds that emphasise its strongest characteristics: Sport Line and xLine. Each sharpens the entire vehicle's appearance and offers a uniquely different interior atmosphere. The Sport Line highlights BMW X1's athletic character with, for example, a high-gloss Black trim or Coral Red Nevada leather with grey/black piping. BMW interior designers were inspired by BMW's long motorsport tradition, where red and black are the colours of victory. BMW's xLine attractively complements the lifestyle of active people. The calming combination of various earth tones for the seat covers and the matt decorative trim with an open-pored wood texture highlight the BMW X1's natural strength. And like the BMW Sport Line, contrasting piping adorns the backrests of the optional leather seats.
Regardless of which individual equipment or BMW Line you choose for the interior of your BMW X1, you can always count on a perfectly matched combination of colours, materials and shapes that underlines its unique character. Because every single detail reflects the expertise and keen sense of style of the BMW designers. Functionality and safety play a decisive role, but it's the overarching aesthetic appeal that makes the BMW X1 so unique.

Dynamic: Sport Line

The BMW X1 is the most agile vehicle in its class. And its athletic character can be further emphasised with the new Sport Line, which features design elements such as a high-gloss Black interior trim and Coral Red leather upholstery.

BMW ConnectedDrive
In touch with your world.

AN INDEPENDENT THINKER, JUST LIKE YOU.

The Vehicle Finder function of the My BMW Remote app from BMW Assist locates your new BMW X1 up to a distance of 1,500 metres and guides you to it. Then you can conveniently unlock the car using your iPhone.

●► We live in a world overflowing with information. So it's increasingly necessary to filter out what is important from what is not. The optional BMW ConnectedDrive* convenience, infotainment and safety features help you do just that.

So you want to take the fastest route to an exclusive restaurant, explore the hottest live venues in the city and return to your BMW X1 again after an unforgettable evening? t's all possible with the latest functions from BMW ConnectedDrive. With BMW Assist, you can find the hippest clubs and bars and enter destinations directly into the navigation system with the Community Function on BMW Routes to find the most direct route. RTTI (Real Time Traffic Information) checks the traffic conditions on main roads while you drive and passes that information on to the navigation system in real time. And if you have activated the dynamic route option, this will automatically change the route in the event of slow-moving traffic or congestion. The Aupeo! App, available in conjunction with the optional Apps feature, provides the perfect musical accompaniment: a personalised internet radio with around one million songs from over 40 countries.

Of course, this level of convenience and infotainment doesn't mean sacrificing safety. The High-Beam Assistant optimally illuminates dark streets and automatically dims the high-beam lights in the presence of oncoming traffic. Should the unforeseeable happen, you can feel at ease knowing that BMW Assist has automatically initiated an Advanced eCall, so help is on the way. All relevant information – like your exact position – is relayed to the rescue services via the BMW Assist call centre. This and other BMW ConnectedDrive innovations make your drive safer and more comfortable than ever before. So you can arrive at your destination more relaxed and enjoy sheer driving pleasure on every trip.

* May not be available in all countries. Please consult your BMW partner.

WAY AHEAD OF THE REST.

excels on the way home – a feat that requires a whole package of innovations. BMW TwinPower Turbo engines featuring lightweight construction, the latest fuel injection technologies, fully variable power distribution and innovative turbochargers help to sustainably reduce fuel consumption and CO_2 emissions – to just 4.9 l/100km and 129g/km with the new BMW X1 sDrive20d at 135kW (184hp), for example. The precision of the eight-speed automatic transmission also saves fuel, as does the Auto Start/Stop function, electric power steering and Brake Energy Regeneration. The optional ECO PRO Mode improves fuel-efficiency even more and is activated via a button on the centre console. It optimizes the car's fuel consumption and minimises the energy used by the air conditioning and other features. The fuel saved is calculated into bonus mileage and displayed in the on-board computer.

►► With the efficient latest generation BMW TwinPower Turbo engine, you can enjoy an extremely dynamic yet gratifyingly economical ride. And other new BMW EfficientDynamics technologies work together to reduce the BMW X1's emissions even further.

BMW is an advocate of efficient driving, but believes that driving pleasure should never be compromised. This philosophy is reflected in their BMW EfficientDynamics technology program that greatly reduces fuel consumption and emissions, while increasing driving dynamics. The new BMW X1's efficiency

A BRIEF PAUSE BEFORE TOMORROW BEGINS.

■► As one thrilling day comes to an end, the excitement for tomorrow begins. Because no matter what tomorrow brings, you can enjoy the new BMW X1's tremendous versatility, exceptional driving dynamics and impressive design in any situation.

Breakfast with friends, a business meeting at noon, then off to kiteboarding. With the new BMW X1, you feel at ease no matter where you're headed. It will accompany you through all facets of modern life, 24 hours a day, 365 days a year. And best of all, this sporty yet elegant SAV always guarantees maximum driving pleasure.

Pure power, maximum performance and low fuel consumption are the defining features of the BMW TwinPower Turbo 2.0 litre petrol engine in the new BMW X1.

GET MORE WITH FOUR.

FOUR-CYLINDER PETROL ENGINES IN THE BMW X1

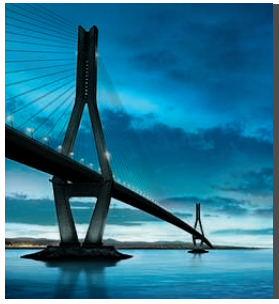
OUTPUT 135KW / 184HP AND 180KW / 245HP

TORQUE 270NM AND 350NM ABOVE 1,250RPM.

FUEL CONSUMPTION (COMBINED) 7.8 LITRES/100KM AND 182 GRAMS CO_2/KM

The BMW TwinPower Turbo four-cylinder petrol engine in the new BMW X1 features the very latest engine technologies. Together, the TwinScroll turbocharger, variable valve control, Double-VANOS camshaft control and High Precision Direct Injection guarantee high performance and low fuel consumption. The lightweight construction further boosts driving dynamics while also saving fuel.

Up until recently, engines were based on a simple formula: plenty of cylinders and ample capacity equals high performance and maximum prestige. But the rules have changed. A greater engine capacity also means greater fuel consumption – plus it's no longer necessary for achieving high performance. The solution provided by BMW is called EfficientDynamics. It generates maximum power from a minimum amount of fuel, with fewer cylinders and a smaller capacity, as well as an extensive technology package for even more performance. On this basis, BMW has succeeded in creating a whole new generation of four-cylinder petrol engines. One key element of this technology package is the TwinScroll exhaust turbocharger. This cutting-edge turbo technology channels exhaust fumes into the turbines via two separate ducts. The steady current quickly produces pressure and delivers more power at lower engine speeds. Another component is High Precision Direct Injection, which features a fuel injector located between the four valves in the centre of the combustion chamber. It produces a fine, conical cloud of fuel directly around the spark plug, allowing the fuel to combust more efficiently. Engines with High Precision Direct Injection deliver a higher level of efficiency and produce more torque over a wider range of speeds. Alongside the turbocharger and High Precision Direct Injection, variable valve control is another factor that contributes to greater efficiency. Thanks to its variable control of the lift and opening duration of the intake valves, it lets the exact amount of air into the combustion chamber at just the right moment. The fuel burns cleanly and the engine responds with impressive spontaneity. While Valvetronic controls the intake of fresh air, Vanos determines the opening phases by twisting the camshafts like screws. Together, they produce a high level of torque at low engine speeds, top performance at high engine speeds, fewer emissions and flawlessly smooth idling. All these innovations stand for both old and new values: dynamics and efficiency. A BMW always has both – thanks to its combination of unbeatable technology and outstanding engineering expertise.



BMW ConnectedDrive
In touch with your world.

Our world is becoming more connected every day. BMW drivers are used to the fact that their vehicle and their world are linked – that they can request information, communicate via telephone or email and always be up to date while they're on the go. The BMW ConnectedDrive concept encompasses all the services and innovative technologies that network BMW vehicles and their passengers with the world outside, including the traffic around.

Revolutionising mobile networking. The BMW Vision ConnectedDrive is a visionary roadster with a design that exhilarates from the very first glance. Its dynamic, flowing contours lead the eye from the striking front and along the stretched bonnet of this extraordinary vehicle – a synthesis of exterior and interior. Each of the three levels of the interior stands for one of three BMW ConnectedDrive components – convenience, infotainment and safety. The accompanying functions and controls are illuminated in different colours, which literally radiate a pulsating array of information. More information about this concept vehicle and further research projects is available in the new Future Lab.

www.bmw.com/futurelab

BMW CONNECTED DRIVE – FOR MORE CONVENIENCE, INFOTAINMENT AND SAFETY.

Wherever your journey may lead, you can stay in touch with BMW ConnectedDrive*. Its innovative functions provide optimum integration between the driver, vehicle and the world outside – anytime, anywhere.

Convenience. These ingenious BMW ConnectedDrive innovations include helpful services, such as Real Time Traffic Information (RTTI) from BMW Assist, to make every journey in your BMW a relaxing one.

Rear View camera. The Rear View camera clearly shows the area behind the vehicle on the Control Display. It provides a better view when reversing in parking situations at speeds below 20km/h. In models with tow bar, the Rear View camera features an extra zoom function (available in conjunction with Park Distance Control and a navigation system).

Park Distance Control (PDC). This allows for easy parking and manoeuvring in confined spaces. Acoustic signals and a visual indicator in the Control Display tell you when the front or rear of the vehicle is approaching an object. Distances are measured by ultrasound sensors in the bumpers.

Comfort Access. This system allows you to unlock, lock and start your BMW without inserting the key and it includes vicinity lighting in the exterior door handles. All you need is the remote control in your pocket, which transmits an identification signal to the car. Simply touch the door handle or boot lid and the BMW unlocks or locks as required. Similarly, a touch of the Start/Stop button is all it takes to start the engine. The Comfort Access system can also be used to remotely close the roof on convertible models.

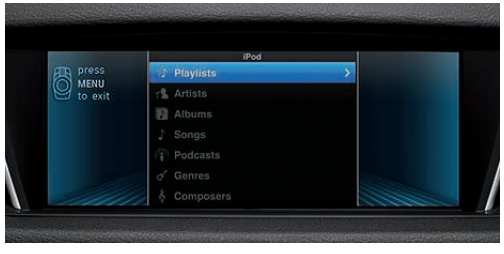
* May not be available in all countries. Please consult your BMW partner.

Infotainment. The infotainment package encompasses services with a technological or media orientation such as the Aupeo! personal internet radio, which supplies drivers with the same level of information and entertainment that you would find at home or in the office.

Aupeo! personal internet radio. Using the apps option, an iPhone and the free Aupeo! personal radio app, you can listen to exactly what you want. This customisable internet radio adapts itself to your music taste. You can choose from over 120 genres and access a music library that now contains around 1 million songs. Using the "love" and "ban" buttons in the Control Display, you can personalise the music you hear to suit your taste. When you press "love", Aupeo! remembers the song and adds similar songs. The "ban" button removes the current song and Aupeo! won't play any similar titles. In no time at all, you'll only be listening to the music that you really enjoy.

BMW Connected App. With the Apps option, an iPhone and the free BMW Connected App from the Apple App Store, you'll always be up-to-date. Using the iDrive system, you can select internet radio stations from around the world. You can also call up the latest status updates from your Facebook or Twitter accounts, view upcoming appointments on the Control Display or have them read out via the car speakers using the read-aloud function. The latest functions allow you to receive RSS news feeds and access Wiki Local, which provides you with Wikipedia information about your local area.

BMW Live. Always stay informed via internet-based mobile services and service features. The latest news (RSS feeds), weather reports and additional information are transmitted directly to your car. All you need is an active Bluetooth data connection from the mobile phone in your car.[1] Even more functions will be available on the Applications menu in future. You can also personally configure which services you want to use.

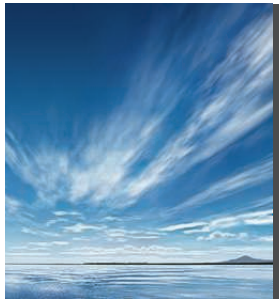


PlugIn. With your iPhone and the Apps option, you'll always be up to date – and of course this applies equally when you use it inside your BMW. PlugIn gives you direct access to all the menu items and allows you to use advanced audio player functions such as playing Genius Mixes and the album cover display. And whenever you add iPod updates to your iPhone, they can be used in your car immediately via BMW ConnectedDrive. Thanks to this interface technology, the integrated use of mobile devices in your vehicle is even more convenient, innovative and safe.

Safety. These BMW ConnectedDrive services are safety technologies that make a significant contribution to reducing the risks that road traffic poses to BMW drivers and their passengers – such as the Advanced eCall from BMW Assist.

High-Beam Assistant. Avoid dazzling other road users – the optional High-Beam Assistant detects sources of light in the vehicle's vicinity and switches between high and low beam as traffic allows. When the system is active, an image sensor behind the interior mirror monitors traffic and light conditions. The assistant function then uses these sensor images to decide whether or not the high-beam lights can be switched on. The high-beam is switched off whenever it detects vehicles in front or oncoming traffic, or when there is sufficient ambient light.

The previous pages show some of the highlights of the BMW ConnectedDrive range. For more innovations and detailed information ask your BMW partner or visit **www.bmw.com/connecteddrive**



BMW EfficientDynamics
Less emissions. More driving pleasure.

BMW was one of the first manufacturers to pursue the goal of efficient drive technologies, as part of its multi-award-winning sustainability strategy. BMW EfficientDynamics, included as standard, is a comprehensive technology package designed to reduce fuel consumption and emissions – while simultaneously enhancing dynamic performance. A winner of many technology awards, it has enabled the BMW Group to reduce the CO_2 emissions of its European new-vehicle fleet by 30% since 1995. 48 models[1] currently produce less than 140g of CO_2 per kilometre. The BMW Group intends to achieve a further 25% reduction in CO_2 emissions by 2020.

sDrive20d EfficientDynamics Edition | 4.5l/100km (119g CO_2/km)[2] | 120 kW (163 hp)

BEST IN CLASS WITH 119g CO_2 /km.

The BMW X1 sDrive20d is a milestone for the BMW Group in their quest to further reduce fuel consumption while simultaneously boosting efficiency. A variety of features, such as the aerodynamic wheel rims, optimise the aerodynamics of this innovative automobile to deliver an impressively low average fuel consumption rate of 4.5 litres per 100km and a CO_2 emissions output of just 119g/km. But this achievement doesn't come at the cost of diminished driving pleasure, thanks to BMW TwinPower Turbo technology and a redesigned engine, electric power steering, an adjusted rear axle transmission ratio, tyres with reduced rolling-resistance and the Optimum Shift Indicator. On the contrary: 380Nm of torque enables the BMW X1 sDrive20d EfficientDynamics Edition to turn 120kW (163hp) into an impressively dynamic and exhilarating drive. For further information visit

www.bmw.com/sdrive20d

BMW EFFICIENT DYNAMICS – MAKING A LITTLE GO A LONG WAY.

Different paths to the same destination: unmistakable BMW driving pleasure. Under the umbrella of the BMW EfficientDynamics project, BMW is continuously developing innovative systems that will bring us closer to the long-term goal of emission-free mobility. The BMW initiative for more driving pleasure is based on several pillars:

Technology package. The optimisation of vehicles powered by conventional diesel and petrol engines continues apace. A comprehensive technology package with innovations such as BMW TwinPower Turbo technology, ECO PRO Mode and the Auto Start/Stop function reduces fuel consumption and CO_2 emissions, while at the same time increasing performance and driving pleasure. And it's standard in every BMW.

BMW ActiveHybrid. The intelligent combination of an electric motor and a combustion engine makes BMW the most dynamic and efficient way to drive a hybrid. BMW's impressive range of series production models with hybrid drive includes the new BMW ActiveHybrid 3[3] and BMW ActiveHybrid 5 as well as the BMW ActiveHybrid 7. All models combine outstanding efficiency with superior dynamic performance.

BMW ActiveE. A new whole new form of dynamism took to the streets in 2011 – the BMW ActiveE. Powered by electricity alone, it debuted as part of a pilot project with a limited production run. With the ActiveE, BMW is paving the way for the future of emission-free mobility, promising to deliver 0% emissions and 100% driving pleasure.[4]

BMW Hydrogen. BMW regards hydrogen as a key to delivering emission-free mobility in the longer term. BMW has been at the vanguard of drive development since the 1980s and debuted the BMW Hydrogen 7 – a luxury saloon with a hydrogen combustion engine – back in 2006.

BMW i. Inspired by the EfficientDynamics philosophy, BMW i develops visionary new vehicle concepts based on electromobility, such as the BMW i3 (Megacity Vehicle) and the BMW i8. While including existing BMW EfficientDynamics technologies, these vehicles also use innovations from the field of intelligent lightweight construction, such as the use of carbon. With a focus on sustainability along the entire value chain and a range of supplementary mobility services, BMW i is redefining our understanding of individual mobility.

THE BMW EFFICIENT DYNAMICS FEATURES IN THE NEW BMW X1 AT A GLANCE.

Auto Start/Stop function (for six-speed manual transmission and eight-speed automatic transmision, not available for X1 sDrive18i). The Auto Start/Stop function switches off the engine when the vehicle comes to a temporary standstill (e.g. at traffic lights) to further reduce overall fuel consumption.

Disengageable air conditioning compressor. When the air conditioning is not in use, the air conditioning compressor in all diesel models and the BMW X1 sDrive20i, X1 xDrive20i and X1 xDrive28i is uncoupled from the belt drive, which prevents the usual loss of energy.

BMW TwinPower Turbo technology. In the petrol models, this technology combines a TwinScroll turbocharger, Valvetronic fully variable valve control, Double-VANOS and High Precision Injection (available with the X1 sDrive20i, X1 xDrive20i and X1 xDrive28i). In the diesel models, CommonRail direct injection is combined with a turbocharger (X1 xDrive 25d: two-stage turbocharger) featuring variable turbine geometry. These innovations reduce the fuel consumption of the BMW TwinPower Turbo petrol and diesel engines – while noticeably increasing performance across all engine speeds.

Optimum Shift Indicator. Timely gear shifts are one of the simplest and most effective ways to save fuel. This is where the Optimum Shift Indicator in conjunction with the six-speed manual transmission can help. It shows the driver what gear to use in order to drive more efficiently.

Brake Energy Regeneration means that the generator (alternator) usually only generates electricity when the driver brakes or takes their foot off the accelerator. Previously unused kinetic energy is transformed into electrical energy and fed into the battery.

ECO PRO Mode (optional). This mode enables fuel consumption to be reduced by up to 15% depending on your individual driving style[5]. It intelligently adapts the accelerator sensitivity, the transmission and the heating/air conditioning systems. ECO PRO tips and the display of kilometres saved encourage a particularly efficient driving style (not available for X1 sDrive18i).

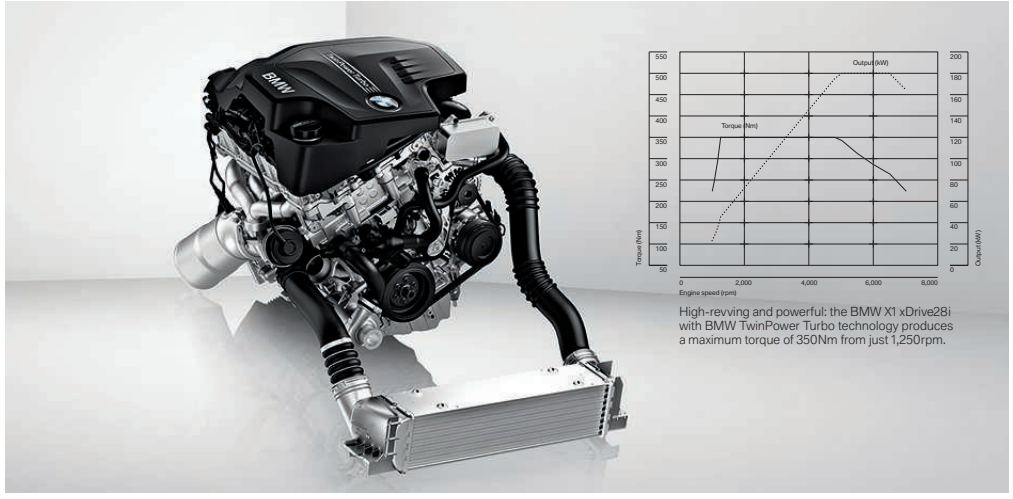
Electric power steering. Unlike conventional hydraulic steering systems, the electric power steering only uses energy during actual steering. The electric motor is inactive when driving straight ahead.

Eight-speed automatic transmission (optional). The particularly smooth gear shifts of the eight-speed automatic transmission produce greater engine efficiency at every speed. The result: a reduction in fuel consumption and more comfortable gear changes. In the new BMW X1 it is also combined with the Auto Start/Stop function. Together, these technologies ensure improved dynamics and driving comfort, coupled with reduced fuel consumption and fewer emissions (not available with the X1 sDrive16d and X1 sDrive18i).

[1] Updated July 2012.
[2] Fuel consumption and CO_2 emission levels are affected by the selected wheel and tyre sizes. More information is available on pages 70/71 and in the price list.
[3] Planned availability: September 2012.
[4] CO_2 emissions produced during the production and provision of fuels and other sources of energy were not taken into account in the calculation of CO_2emissions.
[5] According to an internal BMW fuel consumption study.

BMW ENGINES – INNOVATION BASED ON THE PRINCIPLE OF CAUSE AND EFFECTIVENESS.

The petrol engines. Performance, power delivery and high revving distinguish each and every BMW engine. And of course, every BMW TwinPower Turbo engine available with the new BMW X1 adheres to the BMW EfficientDynamics philosophy. These engines turn maximum performance into pure propulsion, while simultaneously reducing fuel consumption and CO_2 emissions to a minimum. Regardless of which engine you choose, you're guaranteed maximum driving pleasure combined with outstanding efficiency.



High-revving and powerful: the BMW X1 xDrive28i with BMW TwinPower Turbo technology produces a maximum torque of 350Nm from just 1,250rpm.

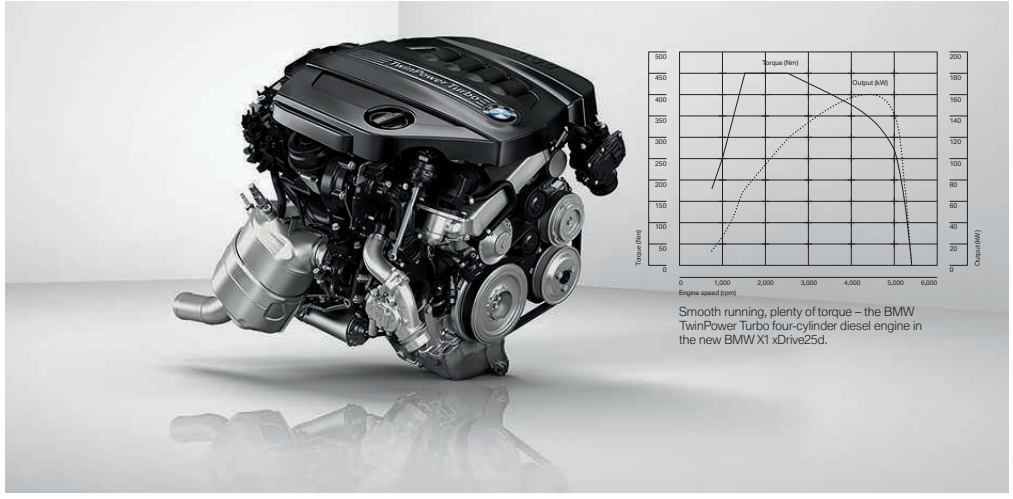
BMW X1 xDrive28i.
The new 2.0 litre engine with a fully aluminium crankcase delivers a maximum torque of 350Nm from an extremely low engine speed of 1,250rpm. It's all down to a combination of BMW TwinPower Turbo technology, High Precision Injection, Valvetronic, Double-VANOS and a TwinScroll turbocharger. Thanks to the incredibly responsive TwinScroll charger and an output of 180kW (245hp),[1] this BMW accelerates from 0 to 100km/h in just 6.1 seconds. Its excellent performance figures include a top speed of 240km/h, an efficient average fuel consumption rate of 7.7–7.8 litres per 100km and an emissions output of 179–182g CO_2/km.

BMW X1 sDrive20i/xDrive20i.
The BMW TwinPower Turbo four-cylinder petrol engine with High Precision Injection, Valvetronic, Double-VANOS and a TwinScroll turbocharger combines powerful engine characteristics with excellent efficiency. An output of 135kW (184hp)[1] and a maximum torque of 270Nm from its 2.0 litre capacity propel the BMW from 0 to 100km/h in just 7.4 seconds (xDrive20i: 7.8s). Its top speed is 220km/h (xDrive20i: 215km/h). Average fuel consumption: 6.9–7.1l per 100km (xDrive20i: 7.5–7.7l) and 162–165g CO_2/km (xDrive20i: 176-179g CO_2/km).

BMW X1 sDrive18i.
With an output of 110kW (150hp)[1] from its 2.0 litre capacity, this engine is more than capable of producing an impressive driving performance. The BMW accelerates from 0 to 100km/h in just 9.7 seconds and reaches a top speed of 202km/h. The BMW four-cylinder petrol engine delivers more performance from less fuel (7.7l/100km) thanks to Valvetronic, while the Double-VANOS variable camshaft control ensures spontaneous and powerful acceleration even at low engine speeds. The CO_2 emissions output is 180g/km.

[1] Fuel consumption and CO_2 emissions are affected by the selected wheel and tyre sizes. For more information please see pages 70/71 or consult the price list.

The diesel engines. The diesel engines available for the new BMW X1 also feature BMW TwinPower Turbo technology for increased efficiency, combining the latest injection technologies and fully variable Performance Control with innovative turbocharger technology for greater dynamics. All diesel models feature lightweight aluminium construction and are equipped with a zero-maintenance particle filter as standard.



Smooth running, plenty of torque – the BMW TwinPower Turbo four-cylinder diesel engine in the new BMW X1 xDrive25d.

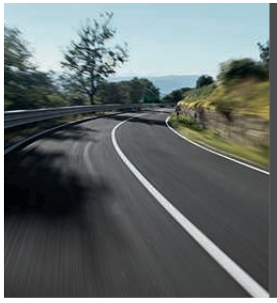
BMW X1 xDrive25d.
With its impressive output of 160kW (218hp), this BMW TwinPower Turbo four-cylinder diesel engine provides more than enough driving pleasure. Even at 1,500rpm, the 2-litre engine delivers an amazing torque of 450Nm. At the same time, the third-generation CommonRail direct injection ensures outstanding efficiency, using as little as 5.9l/100km and producing just 154g CO_2/km. It reaches the 100km/h mark in 6.8 seconds and has a top speed of 230km/h.

BMW X1 sDrive20d / xDrive20d.
Plenty of power in every driving situation: this smooth-running BMW 2.0-litre four-cylinder diesel engine generates an impressive 135kW (184hp)[1]. The CommonRail direct injection and exhaust turbocharger enable acceleration from 0 to 100km/h in 7.8s (xDrive20d: 8.1s). From 1,750rpm and up, the engine provides a maximum torque of 380Nm, while consuming just 4.9 litres of fuel (xDrive20d: 5.5 litres) per 100km. Its CO_2 emissions output is 129g/km (xDrive 20d: 145g/km).

BMW X1 sDrive20d EfficientDynamics Edition.
This BMW TwinPower Turbo 2.0-litre engine with an output of 120kW (163hp) and a torque of 380Nm is a milestone innovation in the reduction of fuel consumption and emissions. Thanks to a package of perfectly integrated technologies, such as the Optimum Shift Indicator and a new engine design, it consumes only 4.5 litres of fuel per 100km and emits just 119g CO_2/km.

BMW X1 sDrive18d / xDrive18d.
This pioneering diesel engine will amaze you with its output of 105kW (143hp)[1]. And when it comes to emissions and fuel consumption, the sDrive18d engine sets the benchmark with a CO_2 emissions level of 128g/km and average fuel consumption rate of only 4.9 litres per 100km (xDrive 18d: 5.5 litres and 144g/km). This BMW four-cylinder diesel engine with CommonRail direct injection, an exhaust turbocharger and a 2.0-litre capacity accelerates with a maximum torque of 320Nm at only 1,750rpm.

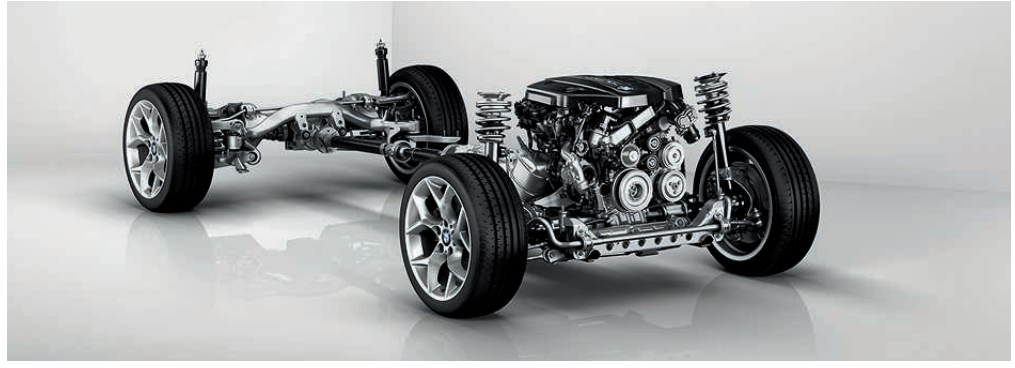
BMW sDrive 16d.
This BMW TwinPower Turbo four-cylinder diesel engine with a 2.0-litre capacity delivers an output of 85kW (116hp)[1]. Accelerating responsively from 0 to 100km/h in 11.5 seconds, it has a top speed of 190km/h. Thanks to the CommonRail direct injection and a turbocharger with variable turbine geometry, the maximum torque of 260Nm is reached within a range of 1,750 and 3,000rpm. It uses just 4.9l/100 km and emits 128g CO_2/km.



Pure driving dynamics – it's a quality embodied by every single BMW without exception. And the technical basis for this thrilling driving experience lies in the suspension. It ensures optimal contact with the road surface and ideal road holding in every situation – the result of its 50:50 weight distribution and an array of seamlessly combined innovative components. BMW engineers are continually re-inventing and refining those classic BMW driving dynamics to ensure that every BMW chassis puts the driver in direct contact with the vehicle and inspires a passion for dynamic driving – while also providing the highest levels of safety and comfort.

THE BEST FOUNDATION FOR SUPERIOR DRIVING DYNAMICS. AN EXCELLENT CHASSIS.

Optimised road holding is crucial to a truly dynamic driving experience. In the new BMW X1, this is achieved by a weight distribution of almost 50:50 between the front and rear axles, as well as neutral steering behaviour, a high level of directional stability and fantastic traction. Read on to find out more.



Steering. Unwanted torque steer on the front axle is completely foreign to the new BMW X1, thanks to the strict separation of steering and drive train. The steering power is evenly distributed and the steering angle is small. As a result, the driver can feel road conditions and receives more direct feedback when cornering. The optional **Servotronic** optimally adjusts the steering support to suit the current speed and reduces the effort required when parking, for example. On top of it all, the electric power steering helps to reduce fuel consumption.

xDrive. The intelligent four-wheel drive system perfectly adapts to difficult road conditions for maximum traction at all times. Using data such as the steering angle or wheel rotation speeds, xDrive reacts immediately upon detecting a tendency to oversteer or understeer, and employs an electronically controlled multi-plate clutch to flexibly distribute drive power between the axles in only fractions of a second, ensuring optimum road adhesion. This allows xDrive to combine the advantages of a four-wheel drive – traction, directional stability and safety – with typical BMW agility. Even better, Hill Descent Control (HDC) negotiates the steepest downhill runs automatically and safely at a little over walking pace.

Performance Control. This optional technology for xDrive models uses dynamic engine and braking intervention to improve cornering behaviour, thus boosting driving pleasure and enhancing safety at the same time. Through targeted braking, the ideal amount of torque is distributed to each wheel depending on the driving situation. Performance Control also optimises engine performance management by gently braking the rear wheel on the inside of the bend, while at the same time increasing drive to the wheel on the outside of the bend. This allows for particularly dynamic cornering with the best possible road adhesion. The BMW X1 also responds to steering commands more spontaneously, for increased agility and sporty driving.

sDrive. The rear-wheel drive is a BMW principle that guarantees driving pleasure. By clearly separating drive and steering, it permits an optimal axle load distribution of virtually 50:50 for thrilling agility and manoeuvrability on virtually any road. Thanks to its optimally configured lightweight chassis, the BMW X1 responds directly to every steering command, delivering precision handling that is unique in its class.

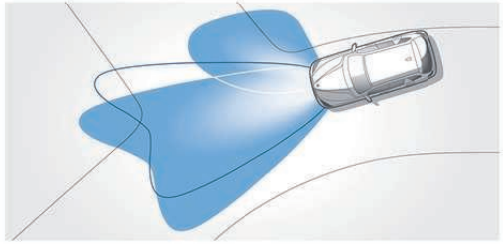
Eight-speed automatic transmission. The finely graded gear shifts of the eight-speed automatic transmission produce greater engine efficiency at every speed. This helps to reduce fuel consumption and ensures more comfortable gear changes.

Sport suspension. This suspension without a lowered chassis features more firmly tuned springs and dampers – for improved road holding and an even more dynamic drive.

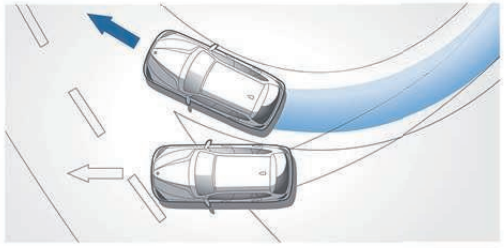
www.bmw.com/x1/dynamics

UNPARALLELED SAFETY WITH THE LATEST BMW TECHNOLOGIES.

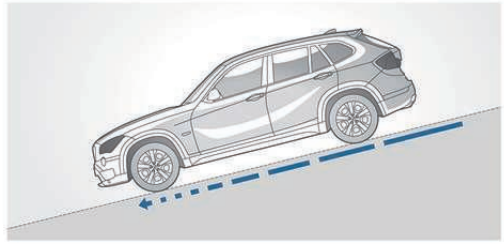
The new BMW X1 is equipped with cutting-edge technologies for every eventuality. Superb handling and innovative equipment come as standard. Drivers benefit from the very latest technologies that provide optimal support at all times. You'll feel safe and protected, no matter where your journey takes you.



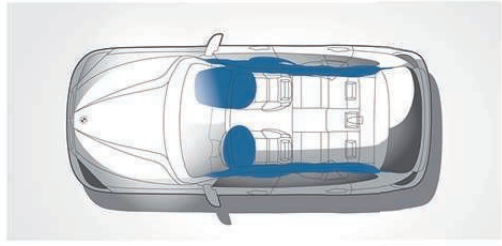
☐ **Adaptive Headlights with variable light distribution, incl. cornering lights.** These illuminate bends by optimally adjusting the swivelling headlights as soon as the driver turns the steering wheel. The cornering lights are automatically activated by a sharp steering angle or when the indicator is switched on, even when the vehicle is at a standstill.



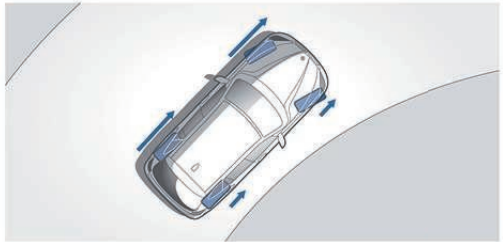
■ **Dynamic Stability Control (DSC)** incl. CBC and Brake Assist. DSC recognises the risk of skidding before it occurs and stabilises the car in milliseconds. The traction mode sub-function (DTC) allows increased wheel slip to optimise acceleration in certain driving conditions and to enable more dynamic driving.



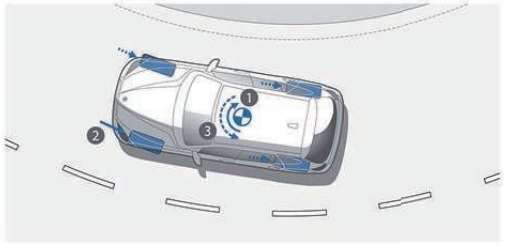
■ **Hill Descent Control (HDC)** ensures that the BMW negotiates the steepest downhill runs automatically and safely at slightly over walking speed, without the driver having to brake. HDC can also be optionally operated via the Cruise Control steering-column stalk (in conjunction with xDrive models).



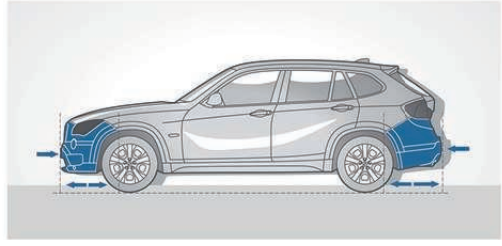
■ **Airbags** are just one of the passive safety elements in your BMW that make up a perfectly coordinated system. Six airbags are installed for precise protection: driver and front passenger airbags, head airbags in the front and rear, as well as side airbags integrated in the front seat backrests.



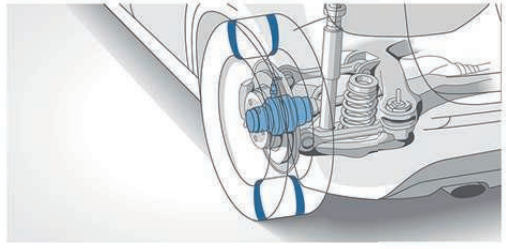
☐ **Performance Control** ensures even greater agility when cornering. Variable power distribution is used to actively turn the car into the corner for even greater driving precision (available for xDrive models).



■ **Cornering Brake Control (CBC)** increases vehicle stability when braking gently in a fast bend. During braking manoeuvres, the load on the rear wheels is reduced, which can lead to oversteering (1). In braking manoeuvres that are outside the ABS control range, CBC addresses this tendency by building up unilateral brake pressure (2) in order to create a stabilising counterforce (3).



■ **Bumpers** absorb impacts at up to 4 km/h without damage. Special deformation zones at the front and rear absorb impacts at up to 15km/h.



☐ **Runflat tyres** – reinforced side walls prevent the tyres from completely collapsing or loosening from the rim if the air pressure drops (standard with all 17" light alloy wheels and larger). This enables you to continue driving for longer, so you can safely make it to the next repair shop.
■ **Runflat indicator** minimises the risks associated with tyre defects. The system detects air pressure changes in the tyres and then warns the driver by activating a light.

■ Standard equipment ☐ Optional equipment

THE NEW BMW X1.

The cockpit with its centre console angled towards the driver is a classic example of driver-orientated BMW design. The standard leather steering wheel (optional leather steering wheel with multifunction buttons pictured here) is a pleasure to hold.

Countless storage space and high-quality materials are characteristic of the open, light interior design and add to the pleasant atmosphere.

The equipment configuration shown here features the standard Anthracite Elektra upholstery and optional Fine Brushed Aluminium interior trim. Numerous practical storage solutions provide added convenience.

Depending on the engine selected, the new BMW X1 features 17" steel wheels with wheel covers (for X1 sDrive16d, X1 sDrive18i, X1 sDrive18d, X1 xDrive18d), 17" light alloy wheels Streamline style 306 (for X1 sDrive20d EfficientDynamics Edition), 17" light alloy wheels Star-spoke 317 (shown here, for X1 sDrive20i, X1 xDrive20i, X1 sDrive20d, X1 xDrive20d) or 17" light alloy wheels V-spoke 318 (for X1 xDrive28i, X1 xDrive25d).

The new BMW X1 sDrive20d in the optional Mineral White metallic exterior paint finish.

THE NEW BMW X1 WITH xLine.

Interior equipment:

- ■ door sill finishers in aluminium with the 'BMW xLine' logo
- ■ seats in Carve cloth/leather upholstery in Amber/Black, or
- □ seats in Nevada leather with contrast piping and X embossing on the headrests of the outer seats
- ■ velour floor mats with Everest Grey trims; with Oyster Nevada leather upholstery, the trims also come in Oyster
- ■ interior trim in Dark Copper, high-gloss, or
- □ Fineline Bay fine-wood trim, matt
- ■ Sport leather steering wheel with multifunction buttons, or
- □ Sport leather steering wheel with multifunction buttons and gearshift paddles
- □ M leather steering wheel
- ■ white or orange ambient interior lighting with different settings

Exterior equipment:

- ■ 18" light alloy wheels Y-spoke 322
- ■ front and rear bumpers with elements in Glacier Silver, matt
- ■ kidney grille slats and front horizontal bars in Glacier Silver, matt
- ■ inserts along the side skirts in Glacier Silver, matt

Special recommendation for xLine:

- □ Satin-finish Aluminium roof railing
- □ Chrome Line Exterior

The seats in Nevada leather (optional) in the exclusive Terra colour with grey/petrol piping and the Fineline Bay interior trim (optional) add an air of elegance to the interior.

■ Door sill finishers in Aluminium with the 'BMW xLine' logo.

■ 18" light alloy wheels Y-spoke 322, with runflat tyres, 8 J x 18 with 225/45 R 18 tyres.

□ 19" light alloy wheels V-spoke 324, with mixed runflat tyres, front 8 J x 19 with 225/40 R 19 tyres, rear 9 J x 19 with 225/35 R 19 tyres.

The new BMW X1 xDrive28i with xLine in the optional Midnight Blue metallic exterior paint finish.

■ Standard with xLine □ Optional with xLine

THE NEW BMW X1 WITH SPORT LINE.

Interior equipment:

- ■ door sill finishers in Aluminium with the 'BMW Sport' logo
- ■ sport seats for driver and front passenger
- ■ seats in Anthracite Median cloth with Coral Red highlights, or
- □ seats in Nevada leather with contrast piping
- ■ velour floor mats with Coral Red trims
- ■ interior trim in Black, high-gloss, or
- □ interior trim in Fine Brushed Aluminium
- ■ Sport leather steering wheel with multifunction buttons and red contrast stitching or
- □ Sport leather steering wheel with multifunction buttons, gearshift paddles and red contrast stitching
- □ M leather steering wheel
- ■ white or orange ambient interior lighting with different settings

Exterior equipment:

- ■ 17" light alloy wheels V-spoke 318 (standard for X1 sDrive16d, X1 sDrive18i/18d and X1 xDrive18d)
- ■ 18" light alloy wheels Double-spoke 421 in bi-colour (standard for X1 sDrive20i/20d, X1 xDrive20i/28i/20d/25d), or
- ■ front and rear bumpers with elements in Black, high-gloss
- ■ kidney grille slats and front horizontal bars in Black, high-gloss
- ■ inserts along the side skirts in Black, high-gloss
- ■ exterior mirror caps in body colour, or
- □ exterior mirror caps in Black, high-gloss
- ■ Black, chrome-plated tailpipe

Special recommendation for Sport Line:

- □ BMW Individual High-Gloss Shadow Line roof railing
- □ BMW Individual High-Gloss Shadow Line

The driver and passenger sport seats offer exceptional support and are reminiscent of classic motorsport design in Coral Red Nevada leather (optional) with grey/black piping and the high-gloss Black interior trim.

■ Door sill finishers in Aluminium with the 'BMW Sport' logo.

■ 17" light alloy wheels V-spoke 318, 7.5 J x 17 with 225/50 R 17 tyres (standard for X1 sDrive16d, X1 sDrive18i/18d, X1 xDrive18d).

■ 18" light alloy wheels Double-spoke 421, bi-colour, with runflat tyres, 8 J x 18 with 225/45 R 18 tyres (standard for X1 sDrive20i/20d, X1 xDrive20i/28i/20d/25d.

The new BMW X1 xDrive28i with Sport Line in the optional Glacier Silver metallic exterior paint finish.

■ Standard with Sport Line □ Optional with Sport Line

THE NEW BMW X1 WITH THE M SPORT PACKAGE.

Interior equipment:

- ■ door sill finishers in Aluminium with the 'M' logo
- ■ sport seats for driver and front passenger
- ■ seats in exclusive cloth/Alcantara upholstery, or
- □ seats in Nevada leather
- ■ interior trim in dark cross-hatch Aluminium, or
- □ interior trim in Fineline Light fine-wood trim
- ■ M footrest
- ■ shortened gear lever (only in conjunction with a six-speed manual transmission) with M logo
- ■ BMW Individual roofliner Anthracite
- ■ M leather steering wheel with multifunction buttons, or
- □ M leather steering wheel with multifunction buttons and gearshift paddles

Exterior equipment:

- ■ 18" M light alloy wheels Double-spoke 355 M, or
- □ 19" M light alloy wheels Double-spoke 225 M
- ■ M Aerodynamics package (front and rear bumpers as well as side skirt)
- □ BMW Individual High-Gloss Shadow Line roof railing
- ■ BMW Individual High-Gloss Shadow Line
- ■ Black ornamental grille with extra wide high-gloss Black kidney grille slats and Black air vents in the front apron
- ■ M Sport suspension

The interior features of the M Sport package include the sport seats shown here in exclusive Anthracite cloth/Alcantara upholstery and the dark cross-hatch Aluminium trim (M Sport package not available with BMW X1 sDrive20d EfficientDynamics Edition).

■ M door sill finishers with chrome inserts and the 'M' logo are an invitation for action.

■ 18" M light alloy wheels Double-spoke 355M, with mixed runflat tyres, front 8 J x 18 with 225/45 R 18 tyres, rear 9 J x 18 with 255/40 R 18 tyres.

□ 19" M light alloy wheels Double-spoke 225 M, with mixed runflat tyres, front 8 J x 19 with 225/40 R 19 tyres, rear 9 J x 19 with 255/35 R 19 tyres.

powered by M

Standard equipment Optional equipment • Recommended colour combination — Not available

[1] Only in conjunction with the M Sport package.
[2] Planned availability: September 2012.

Standard / Optional equipment.

☐ **Xenon headlights for high and low beam,** incl. headlight washing system and accent lights with LED technology – for the best possible illumination of the road at night and in poor visibility. The four bright white LED light rings can be used as daytime running lights.
☐ **Adaptive Headlights with variable light distribution, incl. turning lights,** only in conjunction with Xenon headlights and rain sensor, optimally illuminate bends by electro-mechanically swivelling the headlights along the horizontal axis when the driver turns the wheel.

■ **Dynamic brake lights** help following vehicles to better assess your braking level. When braking normally, the brake lights light up fully, but during an emergency braking procedure the brake lights flash. This way any traffic behind can instantly distinguish between light deceleration and more urgent situations –for increased safety on the road.

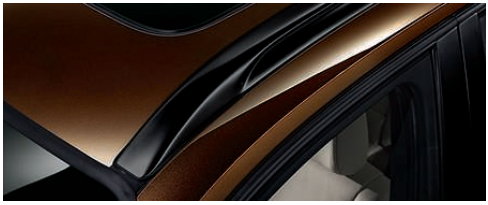
■ **Fog lights,** integrated in the front apron for improved safety in poor visibility. This feature includes heating for exterior mirrors and windscreen washer jets.

■ **Exterior mirrors,** painted in body colour (also available in high-gloss Black with the BMW Sport Line), with electric adjustment and aspheric on the driver's side, with integrated LED indicators.
☐ **Interior and exterior mirrors with automatic anti-glare function,** the glare from following cars is automatically reduced when the amount of incident light exceeds a defined limit.

☐ **High-Beam Assistant** helps the driver at night by automatically switching between high and low beam depending on the presence of vehicles in front, oncoming traffic and adequate street lighting.

☐ **Rain sensor,** incl. automatic headlight activation, automatically activates the windscreen wipers and adjusts wiper frequency. The integrated automatic headlight activation automatically switches on the low beam headlights at dusk, when it rains or when entering tunnels.

■ Standard equipment ☐ Optional equipment



☐ **Roof railing, black,** harmoniously matches the design of the vehicle and provides the basis for a multifunctional and easy-to-use BMW roof unit for the safe transportation of luggage, bicycles, surf boards and more.

☐ **Roof railing, satin-finish Aluminium,** the flat roof railing is also available in satin-finish Aluminium for an even more individual appearance (strongly recommended together with xLine).

☐ **BMW Individual High-Gloss Shadow Line roof railing** looks strikingly sporty in high-gloss Black (strongly recommended together with Sport Line, standard with the M Sport package).

☐ **Panorama glass roof** with large opening, surface area and wind deflector. The first half of the window can be electrically angled at the push of a button and features an additional sliding function, electric roofliner (sunblinds) and remote opening and closing with trap release.
☐ **BMW Individual roofliner in Anthracite,** sunblinds and roof handles in Black.

☐ **Chrome Line exterior** comprises chrome window recess finishers in the front and rear. Also in high-gloss Black, the B-pillar panel, the rear window guide panel and specific mirror features (strongly recommended together with xLine).

☐ **BMW Individual High-Gloss Shadow Line** includes the B-pillar trims, the window guide, the window recess finishers, the mirror base and mirror frame in high-gloss Black (strongly recommended together with Sport Line, standard with the M Sport package).

☐ **Lights package** includes vicinity lighting in the door handles which illuminate the area outside the doors for 20 seconds once the doors are unlocked. Additional features include reading lights at the front and rear, front footwell illumination, vanity mirror lights for driver and front passenger and Ambient light.

☐ **Tow bar** with removable ball head. The ball head can be conveniently stowed underneath the luggage compartment floor when removed.

Standard / Optional equipment.

■ **17" steel wheels with wheel covers:**[1] 7.5 J x 17 with 225/50 R 17 tyres, also available as a complete winter wheel set from the Original BMW Accessories range (standard with X1 sDrive16d, X1 sDrive18i, X1 sDrive18d, X1 xDrive18d).

■ **17" light alloy wheels Streamline 306:**[1,2] 7.5 J x 17, 225/50 R 17 tyres (standard exclusively with the X1 sDrive20d EfficientDynamics Edition).

☐ **17" light alloy wheels Star-spoke 317:**[1] 7.5 J x 17, 225/50 R 17 tyres, also available as a complete winter wheel set from the Original BMW Accessories range (not in conjunction with xLine; standard with X1 sDrive20i, X1 xDrive 20i, X1 sDrive20d and X1 xDrive20d).

☐ **17" light alloy wheels V-spoke 318**[1]**:** 7.5 J x 17, 225/50 R 17 tyres (standard with X1 xDrive25d and X1 xDrive28i; in conjunction with Sport Line standard with X1 sDrive16d, X1 sDrive18i/18d and X1 xDrive18d).

☐ **18" light alloy wheels Star-spoke 320** with 8 J x 18, 225/45 R 18 runflat tyres.

☐ **18" light alloy wheels Double-spoke 321** with 8 J x 18, 225/45 R 18 runflat tyres.

☐ **18" light alloy wheels Honeycomb styling 323,** bi-colour, with mixed runflat tyres, front 8 J x 18 with 225/45 R 18 tyres, rear 9 J x 18 with 255/40 R 18 tyres.

[1] Includes BMW Mobility Set or optionally available with runflat tyres.
[2] Please check the availibility of other light alloy wheels with your BMW Partner.

■ Standard equipment ☐ Optional equipment

☐ **18" light alloy wheels Y-spoke 322** with 8 J x 18, 225/45 R 18 runflat tyres (exclusively available with xLine).

☐ **18" light alloy wheels Double-spoke 421,** bi-colour, with 8 J x 18, 225/45 R 18 runflat tyres (exclusively available with Sport Line).

☐ **19" light alloy wheels V-spoke 324,** with mixed runflat tyres, front 8 J x 19 with 225/40 R 19 tyres, rear 9 J x 19 with 255/35 R 19 tyres.

☐ **18" M light alloy wheels Double-spoke 355 M** with mixed runflat tyres, front 8 J x 18 with 225/45 R 18 tyres, rear 9 J x 18 with 255/40 R 18 tyres (exclusively available with the M Sport package).

☐ **19" M light alloy wheels Double-spoke 225 M** with mixed runflat tyres, front 8 J x 19 with 225/40 R 19 tyres, rear 9 J x 19 with 255/35 R 19 tyres (exclusively available with the M Sport package).

Standard / Optional equipment.

☐ **Sport leather steering wheel with multifunction buttons** (diameter 369mm) with chrome insert and three spokes.
☐ **Sport leather steering wheel with gearshift paddles** for distinctly dynamic driving (in conjunction with an automatic transmission, not available with the X1 sDrive16d, X1 sDrive18i, X1 sDrive18d and X1 xDrive18d).
☐ **Steering wheel heating for the Sport leather steering wheel with multifunction buttons** quickly heats up the steering wheel rim at the push of a button.

☐ **M leather steering wheel** (diameter 368mm) with thumb rests and three spokes.
☐ **M leather steering wheel with gearshift paddles** for distinctly dynamic driving (in conjunction with an automatic transmission, not available with X1 sDrive16d, X1 sDrive18i, X1 sDrive18d and X1 xDrive18d).

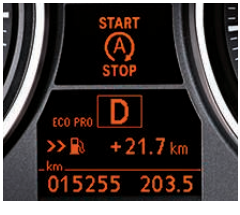
■ **Leather steering wheel** (diameter 375mm), three spokes (shown here with optional multifunction buttons).

■ **Six-speed manual transmission** for a particularly sporty drive. Immensely smooth, with perfect ratios and precise, short-throw gear shifts. The addition of a sixth gear means that the gear ratios are more closely spaced, enabling you to make even more individual use of the engine's power.

☐ **Six-speed automatic transmission** delivers fast and precise gear shifting (available with the X1 sDrive18i).
☐ **Eight-speed automatic transmission** with electric gear lever and adaptive transmission allows fast and comfortable gear shifts (shown here; not available with X1 sDrive16d and X1 sDrive18i).

☐ **Cruise Control with braking function** stores and maintains a desired speed above approx 30km/h (activated using the left-hand steering-column stalk).

■ **On-board computer** provides information about average speed, average and current fuel consumption, range and outside temperature.
■ **Optimum Shift Indicator** shows when switching to another gear would be more fuel efficient (not available with X1 sDrive18i).



■ **Auto Start/Stop display** on the Info Display indicates when the engine has been switched off by the Auto Start/Stop function (e.g. at traffic lights or in a jam). The display turns off again when the engine automatically restarts (not available with X1 sDrive 18i).

☐ **Mobile phone preparation Business with Bluetooth interface**[1], incl. hands-free kit, connections for recharging and external aerial, ambient light, specific snap-in adapter available from Original BMW Accessories.

[1] More information on recommend devices can be found at **www.bmw.com/bluetooth**

☐ **ECO PRO Mode,** activated via a button on the centre console, encourages a particularly efficient style of driving (only available in conjunction with automatic air conditioning).

☐ **Navigation system Business,** incl. CD drive, iDrive Controller with direct menu control buttons, functional bookmarks, integrated hard disc for navigation data and built-in high-resolution 6.5" display.

☐ **Navigation system Professional,** incl. hands-free kit with USB interface, instrument panel with extended functionality, Radio Professional with DVD drive, iDrive Controller, integrated hard disc, built-in high-resolution 8.8" colour display and RTTI-compatible.

☐ **BMW Assist**[2] supports the driver with features such as Advanced eCall, RTTI and the Information Service.
☐ **BMW Online**[2] provides access to online services (email, customised portals, e.g. for news or information from the Google Maps database).

☐ **Internet preparation** for internet access when the vehicle is stationary. You can access any web address. The iDrive Controller assumes the function of a computer mouse (in conjunction with Navigation system Professional). Professional).

☐ **Rear View camera** clearly shows the area behind the vehicle on the Control Display. The rear view camera provides a better view when reversing in parking situations at speeds below 20km/h. In models with tow bar, the Rear View camera features an extra zoom function (available in conjunction with Park Distance Control and a navigation system).

☐ **Park Distance Control, front and rear,** makes parking and manoeuvring in tight spaces much easier. The distance between your vehicle and obstacles is indicated acoustically and visually in the Control Display in conjunction with an optional navigation system.
☐ **Park Distance Control,** rear.

■ **AUX-IN connection,** incl. 12V socket for an external audio source such as an MP3 player.
☐ **Hands-free kit with USB interface** enables a wireless Bluetooth connection between Bluetooth-capable mobile phones and the vehicle. The integrated USB interface can be used to connect audio sources such as MP3 players, iPods and USB sticks (only in conjunction with Radio Professional).

○ **DVD system for rear**[3] features an integrated monitor with a 7" colour display in the centre armrest. The DVD system plays DVDs as well as audio CDs (also in MP3 format). JPEG images can also be displayed.

☐ **HiFi loudspeaker system** with eight loudspeakers for brilliant sound.
☐ **Harman Kardon Surround Sound System** with powerful amplification and eleven loudspeakers for superb sound.

[2] Can be used free of charge for the first three years.
[3] Available from the Original BMW Accessories range. This equipment is installed after manufacture.

Standard / Optional equipment.

☐ **Sport seats** for driver and front passenger (shown here in optional leather upholstery), with optimal lateral support thanks to higher seat side panels and infinitely variable electric backrest width adjustment. Lengthwise seat position, seat height, backrest angle, seat angle and thigh support can be manually adjusted.

■ **Standard seats** with manual adjustment for the seat height, lengthwise seat position, backrest angle and headrest height (shown here with Carve cloth/leather upholstery from the xLine range).

☐ **Seat heating** for driver and front passenger (three settings). Seat surfaces and backrests incl. lateral supports can be heated to ensure a pleasantly warm surface shortly after starting the car.

☐ **Seat adjustment, electric,** for driver and front passenger with seat height, backrest, length and angle adjustment, with memory function for driver's seat and exterior mirrors (incl. automatic parking function). Two individual positions can be stored for the driver's seat and exterior mirror.

☐ **Lumbar support** for driver and front passenger seats, height and depth can be electrically adjusted to provide a perfect ergonomic seating position and to support the back muscles.

○ **Smoker's package** includes a cigarette lighter and ash tray in the centre console at the front. The portable ash tray can also be mounted, for example, to the cup holders in the armrests.

■ **Air conditioning,** incl. microfilter, for a comfortable interior temperature all year round.
☐ **Automatic air conditioning** (shown here), incl. automatic air recirculation, microfilter, fogging and solar sensors, with separate temperature settings for driver and front passenger. (This equipment includes the ECO PRO Mode, except for the X1 sDrive18i. Standard with X1 xDrive28i and X1 xDrive25d.)

■ **Radio Business CD** with VHF and MW reception, six station buttons, automatic volume adjustment, MP3-compatible CD drive, five loudspeakers.
☐ **Radio Professional,** (shown here) incl. MP3-compatible CD drive, six loudspeakers and a two-line display.

☐ **CD changer for 6 discs** (available in conjunction with a navigation system or Radio BMW Professional).

☐ **12-volt sockets (three)** are located underneath the fold-down centre armrest, on the edge of the rear centre console and on the right side of the luggage compartment (part of the optional storage package).

☐ **Cup holders,** mountable, incl. fixture on the centre console (part of the optional storage package).

■ **Storage compartment** on top of the instrument panel is spacious (for vehicles without a navigation system).

■ **Cup holders,** ergonomically positioned in the centre console.

☐ **Rear armrest** with two integrated cup holders (part of the optional storage package).

☐ Spacious **door pockets** with room for bottles with a volume of up to one litre. The front door pockets also feature tensioning belts for securing small items such as a parking disc.

Standard / Optional equipment.

☐ **Storage compartment** underneath the luggage compartment floor can be flexibly used with four variable divider elements (part of the optional storage package).

☐ **Luggage compartment partition net,** can be attached to the roof liner behind the front seats or behind the rear seats, protecting passengers from falling objects, and allowing the luggage compartment to be fully loaded to maximum height. When not in use, it can be folded up into a bag and stored in the side of the luggage compartment.

○ **Ski and snowboard bag** for safe and clean transport of up to four pairs of skis or three snowboards with up to four occupants in the car; the ski bag can be easily removed and so used outside the vehicle.

■ **ISOFIX child seat attachment,** rear on the two outer rear seats for safe attachment of a child seat with clip-in plug connectors and additional fastening points in the upper section.
☐ **Front passenger airbag deactivation.**

■ **Personal Profile:** Depending on the equipment fitted, the Personal Profile stores personal settings – such as the temperature and air distribution of the automatic air conditioning – and activates them when your key is used to unlock the central locking.

☐ **BMW Service Inclusive.*** Service costs are another area where your BMW Service partner can offer you an intelligent solution. With BMW Service Inclusive, routine maintenance service will be provided at no extra cost to you, for the agreed duration or mileage. Find out more at
www.bmw.com/ServiceInclusive

☐ **BMW Welt:** Taking delivery of a car has always ranked among the best moments for any driver. Now that moment can become a truly unforgettable day – at the BMW Welt, the experience and delivery centre in Munich, Germany. Visit the museum, tour the plant or explore the technology studio and feel the pure fascination of BMW. Find out more at
www.bmw-welt.com

* This service may vary by country.

All dimensions in the technical drawings are given in millimetres. Luggage compartment capacity 420–1,350 litres. Values in ( ) in conjunction with the Panorama glass roof.

[1] The figure quoted includes a 90% full tank, 68kg for the driver and 7kg for luggage. Unladen weight applies to vehicles with standard equipment. Optional equipment may increase this figure.
[2] The actual overall trailer weight may not exceed the max. permitted trailer load, while taking into account the max. permitted tow bar download.
[3] BMW recommends the use of RON 95 super unleaded petrol. Unleaded fuels RON 91 and higher with a maximum ethanol percentage of 10% may also be used. Output and fuel consumption figures apply to RON 98 fuel.
[4] All engines comply with the EU5 emissions standard. Fuel consumption figures are determined according to the ECE driving cycle, which consists of approximately one third urban traffic and two thirds extra-urban driving (based on the distance covered). CO_2 emissions are measured in addition to fuel consumption. Optional equipment may increase these figures. Fuel consumption and CO_2 emissions are affected by the selected wheel and tyre sizes. Please consult the price list for more detailed information.
[5] Height including roof aerial is 1,573mm.

Values in [ ] refer to vehicles with six-speed automatic transmission (X1 sDrive18i) or with eight-speed automatic transmission (all other models except the X1 sDrive16d).

The BMW Service concept: always up to speed. When you buy a BMW, you can look forward to superb service and comprehensive customer care, with a worldwide network of more than 3,300 BMW partners in over 150 countries ready to assist you at any time. The vehicle's on-board diagnostics keep you informed of when the car is next due for a check-up and what work needs to be done: **Condition Based Service (CBS)** tracks service fluids and the condition of essential parts subject to wear. It also monitors time and mileage-linked service requirements of your BMW. Using these measurement data, the Info Display in the cockpit automatically alerts you in advance whenever any part of the vehicle requires servicing.

The iDrive Control Display contains exact information on which vehicle components will need to be serviced and when. In conjunction with BMW TeleServices*, the innovative telematics service provided by BMW Service, the CBS data are automatically transmitted to your BMW Service partner. This means that your service consultant has more time for you, and can provide more comprehensive advice. Your BMW Service partner will of course have **Original BMW Parts** available for any work to be done. In short: quality and safety are our top priorities.

TAILOR-MADE FOR YOUR VEHICLE. DER BMW SERVICE.

BMW Service Inclusive*. Service costs are another area where your BMW Service partner can offer you an intelligent solution. With BMW Service Inclusive, routine maintenance service will be provided at no extra cost to you, for the agreed duration or mileage. Find out more online at **www.bmw.de/ServiceInclusive**

With **BMW TeleServices***, you are always in safe hands. This feature enables your BMW to contact your BMW Service partner and register itself for an appointment. As soon as the CBS sensors detect that a service requirement, the vehicle will initiate an automatic BMW Teleservice call and transmit all service-related data – data which previously had to be collected in the workshop. Your service consultant will then call you back, in order to arrange an appointment. As vehicle information is transferred in advance, time in the garage can be spent more efficiently, so your BMW is back on the road faster. In the unlikely event of a breakdown, BMW TeleServices enables you to transmit diagnostics, vehicle and location data directly to BMW breakdown assistance. With BMW Teleservice Assistance, malfunctions can often be remedied remotely, getting you quickly and easily back on the road. For further information, visit **www.bmw.com/TeleServices**

Mobile Service: In the event of a breakdown, BMW Mobile Service is at your disposal round the clock. Specially trained BMW technicians will do everything necessary to get your BMW back on the road, with telephone or on-site assistance as needed. Simply contact BMW Mobile Service. In addition, all BMW vehicles newly registered from 1 January 2011 have a comprehensive 24-month mobility service in line with applicable BMW Mobile Care warranty conditions (including towing, rental car, taxi, hotel accommodation and vehicle return). This BMW mobility warranty is automatically extended by another 24 months if you have the scheduled engine oil service performed by your authorised BMW Service partner – for up to five years after initial registration. More detailed information is available from your BMW Service partner or online at **www.bmw.com/mobileservice**

BMW Financial Services. If there's only one more thing you could wish for to go with your BMW, it could simply be the perfect financing solution - one that leaves you with enough room for the other good things in life. BMW Financial Services provides you with personalised leasing, finance and insurance options – tailored to suit your requirements and budget. But we offer you more than just favourable conditions. Take for example the components of our leasing package, which include courtesy vehicles and insurance. For further information please visit **www.bmwfs.com.** Find out more – your BMW partner will be pleased to make you an individual offer for your desired car.

* May not be available in all countries. Please consult your BMW partner.

SHAPING THE FUTURE – RESPONSIBLY.

The BMW Group has been ranked the most sustainable automotive company worldwide in the Dow Jones Sustainability Index for the seventh time in a row, because sustainability is an integral part of our value chain – it encompasses every stage from the development of fuel-saving and alternative vehicle concepts to environmentally friendly production processes and recycling. Our research and development philosophy, BMW EfficientDynamics, delivers tangible benefits to customers, the climate and the environment. Since 1995, for example,

EXPERIENCE MORE WITH BMW.

BMW Magazine: information and entertainment. Competent and comprehensive, the BMW Magazine brings you all the latest news from the world of BMW. You will receive two issues per year free of charge when you purchase a new BMW.

BMW Driving Experience: "Learn how to enhance your driving pleasure." Driving a BMW should be fun. And like any other piece of sport equipment, the better you are able to control it, the more fun it is. The BMW Driving Experience teaches you – on road and off, in snow and ice, or even in the Namibian desert – how far you can push your BMW, while still remaining perfectly safe. Topics range from BMW Safety and Snow and Ice to M Race Track Training on one of the toughest race tracks in the world – the Nürburgring. More information is available at **www.bmw-drivingexperience.com**

BMW Welt: joy has a home. Visit Munich, home to the BMW brand for over 90 years, and pick up your new BMW at BMW Welt. There you'll be able to experience BMW with all five senses and see your new BMW for the first time with your own eyes. BMW Welt offers you a tailor-made visitor programme. From relaxing in the Premium Lounge to a factory tour or a visit to the BMW Museum – there are plenty of unique experiences to perfectly complement the hand-over of your new car. It's more than worth it. Visit us online today at **www.bmw-welt.com**. Your local BMW partner can also provide you with further information. We look forward to seeing you.

BMW TV*: your source for all things BMW. This is where you can get to know the brand in all its facets, through comprehensive features, portraits, and background reports. **www.bmw.tv/com** provides you with up-to-date and entertaining information on automobiles, innovations, motor shows, events, sports, and lifestyle topics.

our European new-vehicle fleet's CO_2 emissions have dropped by around 30%.
But we are still aiming for more: over the period from 2006 to 2012, we aim to reduce the amount of resources – such as water and energy – consumed by our vehicle manufacturing operations by 30% per vehicle. In our engine plant in Steyr, Austria, we are already one step further: since 2007, production there has generated no waste water at all.

And of course each of our vehicles is designed for easy and economical recycling after its long running life. Please contact your BMW partner on all matters regarding your end-of-life vehicle. Further information on this topic is also available on our website.
